 - 1.1 Helpful Links
 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release contains the following new features and enhancements:

- Support for the Windows Server 2016 operating system. See the [Supported Operating Environment: eServices page](#) for more detailed information and a list of all supported operating systems.
- Support for GAX 8.5.290.09 and higher.

Resolved Issues

This release contains the following resolved issues:

A new configuration option, **regex-max-pattern-cycles**, enables you to specify the number of pattern cycles to use with screening rules. The default value is 10000, but you can specify any integer from 101 to 99999. Previously, some screening rules might have failed an integrity check if the rule exceeded a certain number of pattern cycles. (KM-4157)

You can now import standard responses that use an existing Id value. (KM-3966)

Upgrade Notes

Your environment must have GAX 8.5.290.09 or higher to upgrade to release 8.5.304.10.
