What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issue:

SMS Server now responds correctly to the last segment of inbound multisegment messages in all scenarios. Previously, it responded incorrectly to the last segment when (a) the *No results* option was set to `true`, and (b) the segments were sent by the SMSC in anything other than strict ascending order; that is, other than in a sequence like (1, 2, 3, ...). (ESR-11307)

Upgrade Notes

No special procedure is required to upgrade to release 8.5.100.09.
