What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

The IFRAME widget no longer sticks in a pending state after you update its refresh rate. (WBRT-5374)

Users without `Genesys Pulse Manage Widgets` privileges can no longer see the custom refresh rate field called `> 60sec` in the wizard. Previously, this field might incorrectly appear and if they tried to update the field, they could not save their widget. (WBRT-5370)
