 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes
 - 1.5 Supported Languages

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

Pulse now correctly refreshes widget data according to the refresh interval, defined in the widget display options. Previously, Pulse might have requested data more frequently than defined. (WBRT-8460)

You can now specify an interval as low as 10 seconds for cycling Wallboards. Previously, Pulse allowed a minimum interval of 60 seconds. (WBRT-8449)

Pulse can now process unlimited simultaneous widget data requests. Previously, Pulse could process up to eight simultaneous requests. (WBRT-8434)

Pulse users can now successfully create or edit widgets. Previously in some scenarios, Pulse might have returned a `Layout not found` error. (WBRT-8409)
