  - [1.4 Upgrade Notes](#)

## What's New

This release contains the following new features and enhancements:

- The Recording Plug-in for GAX supports the SpeechMiner "Send notifications about evaluation sessions for agents" feature, with new permissions.

These permissions include: Show Evaluation Session Score and Evaluation Session.

- The Media Lifecycle Management interface now supports backup of recordings in unzipped format. Refer to [this Recording Lifestyle Scheduler dialog box](#) to see where the setting resides and to [this list of RLS parameters](#) for the parameter description.

## Resolved Issues

This release contains the following resolved issues:

---

Statistical Days is now shown in the Configuration menu in a text box, not as a drop-down box.

Previously, if the Recording Plugin for GAX was installed, the Statistical Days widget would be affected and became a drop-down box under the Configuration menu—an unintended behavior. Now, the text box display for Statistical Days matches its original format in GAX. (GIR-10139)

---

The Recording Plug-in for GAX installation package now includes the file `recording_spd.xml`. (GIR-9200)

---

## Upgrade Notes

No special procedure is required to upgrade to release 8.5.070.93.
