 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release contains the following new features and enhancements:

- A new runtime parameter, **AGG_LEVEL_<LEVEL>_DELAY**, provides control over the frequency with which RAA performs aggregation, by allowing you to specify the minimum time between aggregation runs for each aggregation level (DAY and higher). A corresponding new configuration option, **agg-level-<level>-delay** in the **[agg]** section, allows you to control this feature when RAA is embedded with Genesys Info Mart. For more information, see the [Reporting and Analytics Aggregates Deployment Guide](#).
- The RAA installation package now includes the following driver versions:
 - Microsoft SQL Server 6.0.8112.100 JDBC driver
 - Oracle 12.1.0.1 JDBC driver
 - PostgreSQL 9.4.1212 JDBC driver
