  - **1.3 Resolved Issues**
  - **1.4 Upgrade Notes**

## What's New

This release contains the following new features and enhancements:

- Security Pack now uses OpenSSL version 1.1.1g for Linux operating system. Genesys Security Pack with FIPS 140-2 encryption module is based on OpenSSL 1.0.2 implementation. (MFWK-23220)
- Security Pack now supports TLS 1.3. Strict "TLSv13" protocol support is available with the commonlib versions 8.5.100.80 and higher in Genesys components. (MFWK-23171)
- Security Pack supports creation of SAN certificate with the `create_cert.sh` file. This can be done by using the two new keys, `-SANDomain "list"` and `-SANip "list"`. (MFWK-22937)

## Resolved Issues

This release contains the following resolved issue:

---

The RFC 4366 violation has been fixed. Security Pack no longer sends IPv4 and IPv6 addresses in the `server_name` extension. (MFWK-23051)

---

## Upgrade Notes

No special procedure is required to upgrade to release 8.5.100.25.
