Known Issues and Recommendations

Genesys Security Pack on UNIX

The Known Issues and Recommendations section is a cumulative list for all 8.5.x releases of Genesys Security Pack on UNIX. This section provides the latest information on known issues and recommendations associated with this product. It includes information on when individual items were found and, if applicable, corrected. The Resolved Issues section for each release describes the corrections and may list additional issues that were corrected without first being documented as Known Issues.

See also Internationalization Issues.

Security Pack does not allow adjusting the cipher list when using TLS 1.3. The cipher-list option is applicable only for those environments where TLS 1.2 or older versions are used. The affected Security Pack starts from version 8.5.100.25 (MFWK-23926).

Internationalization Issues

Information in this section is included for international customers.

There are no internationalization issues for this product.
