Resolved Issues

This release contains the following resolved issues:

WFM Builder now successfully opens a secure listening port when configured as follows:

- SSL/TLS is enabled
- The authentication provider is specified (**[auth]** provider)
- Builder's Host settings contains an explicit IP address

Previously when configured as such, WFM Builder failed to open a secure listening port. (WFM-33360)

Upgrade Notes

On August 12, 2021, a new software build WFM Builder 8.5.217.00 b2 was made available which includes support for Windows Server 2019. If you previously downloaded 8.5.217.00 b1 (September 14, 2020) and want Windows 2019 support, be sure to download the latest build.
