Resolved Issues

This release contains the following resolved issues:

WFM Server now compares the **Meal Duration**, **Minimum Time Before the Meal**, and **Minimum Time After the Meal** settings to the **Maximum Shift Duration** setting for every meal individually. Previously, when WFM Server compared the total of these three settings to the **Maximum Shift Duration**, it sometimes prevented the legitimate shift configuration from being saved and caused this error to display: *The sum of the Meal Paid Duration, Minimum Time Before the Meal, and Minimum Time After the Meal is more than Maximum Paid Hours of the Shift.* (WFM-26117)

Product Documentation

Genesys Products

[List of Release Notes](#)

Time-off Bidding Period properties are now included in the Configuration Audit Report. (WFM-26113)

The **Performance > Intra-Day** view in Web for Supervisors now shows calculated Scheduled Variance statistics for Multi-Site Activities (MSA). Previously, the Scheduled Variance statistic for MSA was not calculated and displayed as all zeros. (WFM-26042)

Upgrade Notes

No special procedure is required to upgrade to release 8.5.203.22.
