Voice Platform Resource Manager Release Notes

9.x

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
09/24/19	General			X		X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issue:

Resource Manager now allows configuration of supported TLS cipher suites for SIP interfaces through a sub-parameter **tls-cipher-list** in the **transport.x** parameters configured for TLS.

The sub-parameter **tls-cipher-list** can be used to list the ciphers that are applicable for the SIP socket, and only to the TLS socket for both server and client. This parameter allows selection of a list of cipher suites used in TLS. This option is transferred to a third-party library and describes a possible set of cipher suites. Refer to <https://www.openssl.org/docs/man1.0.2/man1/ciphers.html> for the Cipher list format. The default is ALL:!EXPORT:!LOW:!aNULL:!eNULL:!SSLv2 (GVP-39725)
