Genesys Driver for use with Genesys Hub 9.1.x Release Note

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

This Release Note applies to all 9.1.x releases of Genesys Driver for use with Genesys Hub. Links in the [Available Releases](#) section enable you to access information regarding a specific release.

Available Releases

[+] Note about release order

Releases are listed by version number rather than in date order. For this reason, a recent release may be listed after earlier releases, if the version number is lower. Except when otherwise noted in the information for a specific release, each release includes all of the features and corrections that were introduced for the applicable operating system at earlier dates, regardless of the version numbering.

Release 9.1.0:

Release	Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
9.1.018.01	01/08/25	General			X		X

This Release Note lists the supported operating systems for each release at a high level. For more detailed information about the supported versions for each operating system, see the [Messaging Apps/Social Engagement](#) page in the *Genesys Supported Operating Environment Reference Guide*.

Discontinued Support

[+] Note about discontinued items

This section documents features that are no longer supported in this software. This cumulative list is in release-number order with the most recently discontinued features at the top of the list. For more information on discontinued support for operating environments and databases, see [Discontinued Support](#) in the *Genesys Supported Operating Environment Reference Guide*.

- Windows Server 2012.

Discontinued as of: 9.1.007.06

Known Issues

You can find a cumulative list of the Known Issues and Recommendations for all 9.1.x releases of Genesys Driver for use with Genesys Hub, including the issues that are specific to Localized (International) releases, at the following links:

- [Known Issues and Recommendations](#)
- [Internationalization Issues](#)

Related Resources

For additional information about Genesys Driver for use with Genesys Hub, see the following documentation:

- The documentation related to this software is available from the [Messaging Applications](#) product page.
- The [WhatsApp Guide](#) provides details about installing and configuring Genesys Hub Plug-in for Workspace Desktop Edition.
- [eServices Options Reference](#) provides a reference listing of Genesys Driver for use with Genesys Hub configuration options.
- The [Messaging Apps/Social Engagement](#) page in the [Genesys Supported Operating Environment Reference Guide](#) provides detailed information about the supported operating environments, including requirements, supported versions, and any conditions or limitations for Messaging Applications components.

Release Notes for other Genesys components are available [here](#).

Known Issues and Recommendations

Genesys Driver for use with Genesys Hub

The Known Issues and Recommendations section is a cumulative list for all 9.1.x releases of Genesys Driver for use with Genesys Hub. This section provides the latest information on known issues and recommendations associated with this product. It includes information on when individual items were found and, if applicable, corrected. The Resolved Issues section for each release describes the corrections and may list additional issues that were corrected without first being documented as Known Issues.

See also [Internationalization Issues](#) .

WhatsApp fails to store an image with a description longer than 256 characters.

ID: MSGA-2334	Found In: 9.1.002.04	Fixed In: 9.1.003.05
----------------------	-----------------------------	-----------------------------

A `java.lang.NullPointerException: pair can't be null` exception is added to the Digital Messaging Server (DMS) log when an **SesSendOutbMsg** request is sent to DMS.

ID: MSGA-2319	Found In: 9.1.002.04	Fixed In: 9.1.003.05
----------------------	-----------------------------	-----------------------------

The ESP Method **ValidateContact** does not return the appropriate response if the phone number is not found in WhatsApp.

ID: MSGA-2238	Found In: 9.1.002.04	Fixed In: 9.1.003.05
----------------------	-----------------------------	-----------------------------

Users cannot configure more than one WhatsApp channel in Digital Messaging Server.

ID: MSGA-2140, MSGA-2142	Found In: 9.1.001.03	Fixed In: 9.1.002.04
---------------------------------	-----------------------------	-----------------------------

Hub does not include the **To** attribute in its inbound messages to the driver.

ID: MSGA-2039	Found In: 9.1.001.03	Fixed In: 9.1.002.04
----------------------	-----------------------------	-----------------------------

The driver does not support uploading files to Hub when it is connected to the Hub via an HTTP proxy.

ID: MSGA-2035, MSGA-2037	Found In: 9.1.001.03	Fixed In: 9.1.002.04
---------------------------------	-----------------------------	-----------------------------

Names of the outbound attachments in WhatsApp channel are not delivered correctly to the client's phone.

ID: **MSGA-2571, MSGA-2572**

Found In: **9.1.003.05**

Fixed In: **9.1.005.07**

Internationalization Issues

Information in this section is included for international customers. Release numbers in the **Found In** and **Fixed In** fields refer to the English (US) release of Genesys Driver for use with Genesys Hub unless otherwise noted in the issue description.

There are no internationalization issues for this product.

Release 9.1.0

Genesys Driver for use with Genesys Hub Release Notes

You can find links to Release Notes for particular 9.1.0 releases of Genesys Driver for use with Genesys Hub, if available, in the tree menu on the left or in the list of [Available Releases](#).

9.1.017.03

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
08/29/24	Update			X			X

What's New

This release contains the following new features and enhancements:

- A new option, `x-disable-reactions`, has been introduced to specify whether WhatsApp inbound reactions must be processed or not. If the value is `true`, the driver skips processing all WhatsApp reactions to messages. If the value is `false`, the driver processes all WhatsApp reactions as notifications with specific message code.

Resolved Issues

This release contains no resolved issues.

9.1.015.02

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
04/22/24	Update			X			X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

An additional fix has been added for MSGA-3948, initially fixed in the release version 9.1.014.01. Previously, regular expression considered `<client_id>` as number in the message "`<client_id> changed from <from_number> to <to_number>`". Starting from version 9.1.015.02, the regular expression has been fixed to consider `<client_id>` as text. (MSGA-4090, MSGA-3948)

Re-authentication request is done only one time now instead of looping. Previously, when a token expired for initial HTTP request, the driver initiated re-authentication requests in an infinite loop until a non 401 response was received. (MSGA-4082)

9.1.015.00

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
02/12/24	Update			X			X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

Data logger now correctly processes text messages containing % character. Previously, the driver threw an exception in this scenario. (MSG-4040, MSG-4041)

The driver now properly escapes illegal or special characters in filenames of attachments.

Previously, the driver did not escape such invalid characters in the filename. As a result, Genesys Hub Plug-in for Workspace Desktop Edition might have stopped functioning unexpectedly. (MSG-3983)

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
12/15/23	Update			X			X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

A new option, `x-disable-system-messages`, has been introduced to specify whether WhatsApp system messages must be processed or not. If the value is `true`, the driver skips processing all WhatsApp system messages. If the value is `false`, the driver processes all WhatsApp system messages as notifications with specific message code. Currently, only one system message about **phone number changed from Phone Number A to Phone Number B** is supported with notification code `user_changed_number`. (MSGGA-3939, MSGGA-3948, MSGGA-3956)

9.1.008.17

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
08/07/23	Update			X			X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

An issue that caused DMS to incorrectly merge chat sessions from different channels is fixed. The issue occurred if a brand's customer sent separate messages through multiple channels. A new option, `separate-chat-session`, is introduced to fix this issue. Using this option, you can specify whether DMS must create separate chat sessions for a brand's customer when the customer sends separate messages through multiple channels.

- If the value is `true`, DMS creates a separate chat session for each channel when a customer sends messages through multiple channels.
- If the value is `false` (default), messages from different channels sent by the customer are merged into a single chat session.

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
06/16/23	Update			X			X

What's New

This release contains the following new features and enhancements:

- This release introduces a new option, `allowed-content-types`. You can use this option to list the MIME types of supported attachments in a comma-separated format. If no value is set, the driver allows all media types. If the value is none, the driver restricts all media types. This option is applicable only for inbound WhatsApp file attachments. (MSG-3748)

Resolved Issues

This release contains no resolved issues.

Upgrade Notes

No special procedure is required to upgrade to release 9.1.008.12.

9.1.006.08

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
12/18/20	General	Under Shipping Control		X		X

What's New

This release is under shipping control and contains the following new features and enhancements:

- Support for the following operating systems. See the [Messaging Apps/Social Engagement](#) page in the [Genesys Supported Operating Environment Reference Guide](#) for more detailed information and a list of all supported operating systems.
 - Windows Server 2019
 - Red Hat Enterprise Linux 8
 (MSG-2945, MSG-2952)
- The following options are introduced:
 - x-hub-channeltype - Specifies the channel type.
 - x-business-id - Specifies the channel's business ID value.

(MSG-3089, MSG-3090)

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
05/22/20	Update			X		X

What's New

This release contains the following new features and enhancements:

- The driver now supports parallel processing of ESP requests. This enhancement ensures better performance of the driver when sending ESP requests such as `ValidateContact` to Genesys Hub. (MSGA-2536)
- Agents can now send rich media notifications (also known as media message templates) during WhatsApp interactions by inserting structured messages from standard responses. Agents can also view/preview the rich media notifications in the chat transcript. For more information, see [Rich media notifications](#). (MSGA-2485)

No special procedure is required to upgrade to release 9.1.005.07.

9.1.004.08

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
12/26/19	Update			X		X

What's New

This release contains the following new features and enhancements:

- Support for InviteToChat ESP request. This method allows initiation of outbound chat sessions from a strategy and sending WhatsApp notification templates to customers. The InviteToChat request is an invitation for a customer who is using voice IVR interaction to switch to Chat or Messaging and continue the conversation. (MSGGA-2403)
- A new configuration option, media-origin, that specifies the media origin assigned to interactions that are created by InviteToChat requests and submitted to Interaction Server by Chat Server. (MSGGA-2339)

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
06/26/19	General	Under Shipping Control		X		X

What's New

This release contains the following new features and enhancements:

- A new option, x-phone-format, processes a phone number before sending the number as an interaction attribute. (MSGGA-2060, MSGGA-2061)
- The driver now receives and processes location information in the incoming messages. (MSGGA-1904)
- The driver now supports video, audio, and document attachments in both incoming and outgoing messages. (MSGGA-1902)
- Support for OpenJDK 11. See the Prerequisites section on the [eServices](#) page in the *Genesys Supported Operating Environment Reference Guide* for more detailed information and a list of all prerequisites. (MSGGA-2178)

Resolved Issues

This release contains the following resolved issues:

Users can now configure more than one WhatsApp channel in Digital Messaging Server. (MSGGA-2140, MSGGA-2142)

Hub now includes the **To** attribute in its inbound messages to the driver. Now the **_umsFromAddr** and **_umsFromUserId** attributes contain the WhatsApp ID (phone number) of the user who sent the message. The **_umsToAddr** attribute has the business phone number that is configured for this channel. (MSGGA-2039)

The driver now supports uploading images and files to Hub via an HTTP proxy. Previously in this scenario, the driver failed to process these HTTP requests. (MSGGA-2035, MSGGA-2037)

Upgrade Notes

No special procedure is required to upgrade to release 9.1.002.04.

9.1.001.03

Genesys Driver for use with Genesys Hub Release Notes

9.x Genesys Driver for use with Genesys Hub is part of 9.x starting in **9.1.000.02**.

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
04/19/19	Update	Under Shipping Control		X		X

What's New

This release contains the following new features and enhancements:

- The driver can now process an External Services Protocol (ESP) request that is sent from the routing strategy to check if a certain phone number is a client of WhatsApp. (MSGGA-1887)
- The following changes to configuration options:
 - A new option, x-hub-pull-reserve-time, specifies how long in seconds fetched messages are reserved by Genesys Hub. (MSGGA-1988)
 - The option x-hub-pull-size now uses the default value **10** and has a valid value range from **1** to **1000**. (MSGGA-1989)
