Voice Platform Resource Manager Release Notes

9.x

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
10/11/18	General			X		X

What's New

This release contains the following new features and enhancements:

- Resource Manager (RM) now supports Windows Server 2016 Standard edition. See the [Genesys Voice Platform](#) page in the [Genesys Supported Operating Environment Reference Guide](#) for more detailed information and a list of all supported operating systems.
- RM supports TLS connectivity for inter-node communication in Active-Active and Active-Standby configurations.

Resolved Issues

This release contains the following resolved issues:

In a SIP over TLS scenario, RM now retries sending SIP messages after buffering them to overflow cache. Previously, RM discarded failed messages and this resulted in SSL API failure. (GVP-37288)

RM startup is faster now if GVP Reporting Server switches roles. (GVP-36712)

RM no longer logs conference max size warning logs. (GVP-36103)

Upgrade Notes

No special procedure is required to upgrade to release 9.0.013.55.
