SIP Endpoint SDK Overview

SIP Endpoint SDK for .NET Components

12/13/2025

SIP Endpoint SDK for .NET Components

The SIP Endpoint SDK distribution consists of the following main components:

- The SDK, which provides all of the SIP-related functionality. The SDK also provides an interface that you can use to integrate it into different GUI-based applications.
- A sample **QuickStart application** which is built on the SIP Endpoint SDK.

The SDK itself runs on top of the Genesys SIP libraries and Google's WebRTC media stack, while the QuickStart application runs on top of the SDK, as shown here:
