GENESYS

SIP Server HA Deployment Guide

Using Siemens OSV

12/16/2025

Using Siemens OSV

SIP Server integrated with Siemens OpenScape Voice version 5 can be configured in Business Continuity mode. You must configure the option **dr-forward**=no-agent on the Application or DN (Voice over IP Service DN with **service type**=softswitch) when you configure SIP Server.

See the SIP Server Integration Reference for information and instructions about configuring the Siemens OpenScape Voice PBX.
