# Workbench User's Guide

AD Configuration

12/17/2025

---

## Contents

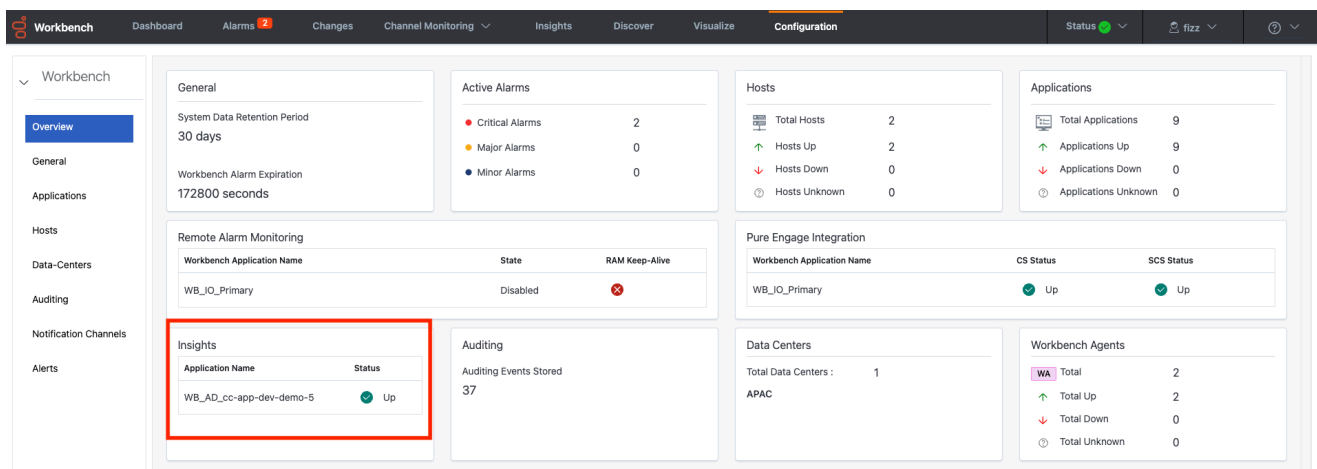

- 1 AD Configuration
  - 1.1 Configuration / Overview
  - 1.2 Configuration / Applications
  - 1.3 Configuration / Hosts

# AD Configuration

The Workbench Configuration Console enables the user to manage AD component(s) configurations and view their respective status.

## Configuration / Overview

The "Configuration / Overview" submenu section has an additional **Insights** based Visualization to view all installed AD Insight application statuses.

## Configuration / Applications

An additional "Workbench Insights" filter has been added to Applications to filter based on AD Insight applications.

## AD Configuration

The screenshot shows the 'Configuration' tab in the Workbench interface. On the left, a sidebar lists 'Workbench' with sub-items: Overview, General, Applications (selected), Hosts, Data-Centers, and Auditing. The main area has a 'Type' dropdown set to 'Workbench Insights' and a 'Status' dropdown set to 'All'. A search bar is present. Below, a table lists applications: 'APAC : WB\_AD\_cc-app-dev-demo-5' (with a 'WI' badge), 'cc-app-dev-demo-5', and 'APAC : WBA\_cc-app-dev-demo-5'. A red arrow points to the 'WI' badge. On the right, the configuration details for 'WB\_AD\_cc-app-dev-demo-5' are shown, including 'Status: UP' and a '1.General' section with fields for 'Workbench Application Name' (WB\_AD\_cc-app-dev-demo-5), 'Data-Center' (APAC), and 'Workbench Application Type' (Workbench Insights).

Note: The  badge indicates the Workbench Insights Application Type.

### Important

- For more information about each configuration option details, please review the [AD Settings](#) section

## Configuration / Hosts

Post installing the AD feature, the **Configuration / Hosts** section will now display AD Host(s) where AD applications are installed

An "AD Insights Hosts" filter has been added to the Type dropdown to filter by AD Hosts only.

The screenshot shows the 'Configuration' tab in the Workbench interface. On the left, a sidebar lists 'Workbench' with sub-items: Overview, General, Applications, Hosts (selected), Data-Centers, and Auditing. The main area has a 'Type' dropdown set to 'AD Insights Hosts' and a 'Status' dropdown set to 'All'. A search bar is present. Below, a table lists applications: 'cc-app-dev-demo-5' (with a 'WI' badge) and 'WBA\_cc-app-dev-demo-5'. A red arrow points to the 'WI' badge. On the right, the configuration details for 'cc-app-dev-demo-5' are shown, including 'Status: UP' and a '1.General' section with fields for 'Host Name' (cc-app-dev-demo-5), 'Host IP Address' (redacted), and 'OS' (linux).

### Important

- For details on Workbench configuration, please review the [Workbench Configuration](#) section.
