# Platform SDK

## General Information - Platform SDK

For details about compatibility between Platform SDK protocols and specific Genesys Framework servers for each major Platform SDK release, refer to the Platform SDK Compatibility with Genesys Framework Components section of Platform SDK Deployment Guide.

### Important

- Genesys support for the platform versions mentioned on this page ends when the respective vendors declare End of Support. For more information, see [Discontinued Support](#).
- Platform SDK does not explicitly state support for web browsers, Server Virtualization or Desktop Virtualization platforms. If you are planning to use such a platform, please check that the operating system on which your Platform SDK application runs is supported, and that Platform SDK prerequisites are met. In case of any doubts, please contact your Genesys account team or e-mail the [virtualization support team](#).

## Supported Operating Systems

**Notes:**

- For Microsoft products with sub-versions such as R1/R2, all versions are supported except as noted for the specific product.
- Genesys supports use of products on Oracle Linux, provided that the Oracle Linux distribution is 100% compatible with a Genesys-supported Red Hat distribution, and that the Oracle Unbreakable Enterprise Kernel is not used. Genesys will only support Oracle Linux based on testing and reproduction of any issues in the equivalent Red Hat Linux version; no investigation or testing will be performed on Oracle Linux itself. Support only applies to Oracle Linux versions 5.x and later.

## Prerequisites

### Notes:

- Be aware that Java SE 5, 6, and 9 are no longer supported by Platform SDK.
- Customers using Platform SDK 8.0 and 8.1.0 must upgrade to version 8.1.1 or higher using a Genesys-supported Java version.
- For details about compatibility between Platform SDK protocols and specific Genesys servers for each major Platform SDK release, refer to [Platform SDK Compatibility with Genesys Framework Components](#).
- Platform SDK for .NET has no dependency on third-party libraries.
- Starting with release 9.0.005.02, Platform SDK for Java supports Netty 4 instead of Netty 3.
