CSTA Connector for BroadSoft BroadWorks Deployment Guide

New in This Release

12/18/2025

New in This Release

The following general changes have been implemented in the 8.1 release of CSTA Connector:

- Support for an application-specific LMS file.
- Polling from BroadWorks Connector to XSP.
- Support for the new Broadsoft AS Switchover functionality.
- Support on Red Hat Enterprise Linux 6 32- and 64-bit platforms.
- Limited display of sensitive information: In logs, new options enable sensitive data in logs to be marked for post-processing by the user, such as deletion, replacement, or hiding. See the Genesys 8.1 Security Deployment Guide for details.
- Compliance with FIPS: TLS as implemented by Genesys meets the Federal Information Processing Standards (FIPS).
