T-Server for CSTA Connector Deployment Guide

Request Handling Enhancements

5/10/2025

Request Handling Enhancements

T-Server has two enhancements to handle queues: request conflict resolution and a new device queue.

Requests submitted by different clients are treated no differently to requests submitted by the same client. For this reason, having multiple clients controlling the same device can result in unexpected behavior.

Note: While this configuration is supported, it should be recognized that there is no special handling for multiple clients.
