# T-Server for CSTA Connector Deployment Guide

Transfer Connect Service Options

12/15/2025

# Transfer Connect Service Options

## tcs-queue

### tcs-queue

Default Value: No default value

Valid Values: Any valid DN number

Changes Take Effect: For the next request for the remote service

Specifies the TCS DN number to which a call, processed by the TCS feature, is dialed after the originating external router obtains an access number. This option applies only if the `tcs-use` option is activated.

## tcs-use

### tcs-use

Default Value: never

Valid Values:

never	The TCS feature is not used.
always	The TCS feature is used for every call.
app-defined	In order to use the TCS feature for a multi-site call transfer request, a client application must add a key-value pair with a TC-type key and a nonempty string value to either the UserData or Extensions attribute of the request.

Changes Take Effect: Immediately

Specifies whether the Transfer Connect Service (TCS) feature is used.

**Warning:** For compatibility with the previous T-Server releases, you can use the value `up-app-depended` for this option. This is an alias for `app-defined`.
