GENESYS™

T-Server for CSTA Connector Deployment Guide

New in This Release

5/9/2025

New in This Release

The following general changes have been implemented in the 8.1 release of CSTA Connector:

- Support for the new Broadsoft Release 17 SP4 feature: Call Recording.

- Multiple connections from CSTA T-Server to BroadWorks Connector.

- Support on Red Hat Enterprise Linux 6 32- and 64-bit platforms.

- Limited display of sensitive information: In logs, new options enable sensitive data in logs to be marked for post-processing by the user, such as deletion, replacement, or hiding. See the Genesys 8.1 Security Deployment Guide for details.

- Compliance with FIPS: TLS as implemented by Genesys meets the Federal Information Processing Standards (FIPS).
